Unlimited Vote Method For **Soul-Split** (Works for some other servers aswell)

1. Make sure you have a VPN (the best is HideMyAss what i'm currently using)
2. Ok so connect to a VPN once done open up your game and login make sure your on World 1
3. now type ::vote in chat and wait for the webpage to appear
4. now once you get to runelocus, Please remember that you can vote only once per 12 hours. The robot check below can be avoided by logging in.
5. Login and put in random info dosen't have to be an actual account it'll come up with an error its fine
6. click next and finish the next one
7. Now claim your reward
8. now switch to a different VPN(change ip)
9. now rinse and repeat you can sell the reward tokens for 20M ea
10. this method is a great way to make money especially for beginners :)

(BONUS) Also if you wanna use this method for other servers you will have to create actual Runelocus accounts and active them, but not for soulsplit method above :)
